

Name:

Q1. Read carefully, and then answer: (13 pt)

There are tens of millions of pieces of rubbish. Scientists call this "orbital debris". You will find the most unusual things floating around the Earth: a camera, a screwdriver, and even a glove! . Most of this rubbish comes from satellites and rockets that stopped working and fell apart. This orbital debris would weigh five million kilogram's on Earth.

This scrapyard could cause serious problems. In August 15 2008, when a space shuttle returned to Earth, it had small but dangerous holes in it made by pieces of space debris. So, let's start thinking of ways to tidy space up .

1. What is the orbital debris ?
2. What will you find the most unusual things floating around the earth ?
.....
3. Where does orbital debris come from??
